Invited Online Talk

Machine Learning for Production: Scaling Machine Learning with MLOps

Wei Chen

Time: Wednesday, 08/02/2023, 7:00 PM — 8:00 PM (CST)

Zoom Link: https://unt.zoom.us/j/82746835249

Abstract: MLOps — machine learning operations, or DevOps for machine learning — is the intersection of people, processes, and platforms for gaining business value from machine learning. In this talk, I will introduce how we implement the idea of MLOps at Nvidia and how it helps to scale machine learning in production.

Bio: Dr. Wei Chen is a senior deep learning software engineer at Nvidia, working on large-scale deep learning infrastructure for autonomous driving. Also, he is an open-source contributor to Ray and Pytorch.
